"Falling in love with Ben Kiem, despite his rowdy pranks and bad-news friends, sensible Linda Eicher must make a difficult decision when a heartbreaking misunderstanding comes between them"--

"Sportbikes today handle better than pure racebikes did just a few years ago. Their sophisticated, versatile suspension offers countless combinations to find the handling that's right for you. This book will help you hone and perfect your suspension for high-performance street riding and track days. Discover the right way to set spring and damping adjustments, and adjust ride height for greater steering responsiveness and traction. Suspension specialists from professional racing and the aftermarket also offer their insights on useful modifications."--Publisher description.

Suspension is probably the most misunderstood aspect of motorcycle performance. This book, by America's premier suspension specialist, makes the art and science of suspension tuning accessible to professional and backyard motorcycle mechanics alike. Based on Paul Thede's wildly popular Race Tech Suspension Seminars, this step-by-step guide shows anyone how to make their bike, or their kid's, handle like a pro's. Thede gives a clear account of the three forces of suspension that you must understand to make accurate assessments of your suspension's condition. He outlines testing procedures that will help you gauge how well you're improving your suspension, along with your riding. And, if you're inclined to perfect your bike's handling, he even explains the black art of chassis geometry. Finally, step-by-step photos of suspension disassembly and assembly help you rebuild your forks and shocks for optimum performance. The book even provides detailed troubleshooting guides for dirt, street, and supermoto--promising a solution to virtually any handling problem.
