The ATA 100 chapters refers to the numbering system and referencing standards for commercial aircraft documentation. Through the 100 chapters, different systems and procedures of aircraft are detailed, allowing personnel to understand certain areas of commercial aircraft quickly and easily. ATA chapters also provide information on parts, benefitting repair technicians, airlines, suppliers, and various others on what parts are, what they do, how to repair them, and beyond.

ATA Chapters, also known as the ATA 100 System Codes, refers to the categorization of parts as organized by the Air Transport Association. These numbers will typically be found in any Component Maintenance Manual (CMM) for any civilian aircraft and one category can consist of several subcategories for different parts. As an example, ATA Chapter 22 refers to Air Conditioning, meaning that ATA Chapter 22 parts can fit into any subcategory fitting shut-off valves, fans, rotary actuators, check ...

ATA 100 contains the reference to the
ATA numbering system which is a
common referencing standard for
commercial aircraft documentation. This
commonality permits greater ease of
learning and understanding for pilots,
aircraft maintenance technicians, and
engineers alike. The standard numbering
system was published by the Air Transport
Association on June 1, 1956.

ATA Chapters - Newport Aeronautical Sales Corp.

ATA chapters (sometimes called 'ATA 100 System Codes') are a way of categorizing the various systems that are on a plane, originally created by the Air Transport Association in 1956. Look at any Component Maintenance Manual (CMM) for any civilian aircraft. At the bottom of every single page is the ATA chapter for that manual.
