Amazon.co.uk: math-basics
Basic Mathematics. This is a text in basic mathematics with multiple uses for either high school or college level courses. Readers will get a firm foundation in basic principles of mathematics which are necessary to know in order to go ahead in calculus, linear algebra or other topics.

Basic Mathematics by Serge Lang - goodreads.com
 $2 + 4 + 6 + \dots + 2k + 2 \times (k + 1) = k(k + 1) + 2 \times (k + 1) = k^2 + k + 2k + 2 = k^2 + 3k + 2$. Since $2 = 1 \times 2$ and $1 + 2 = 3$, $k^2 + 3k + 2 = (k + 1) \times (k + 2)$ Therefore, $2 + 4 + 6 + \dots + 2k + 2 \times (k + 1) = (k + 1) \times (k + 2)$ and the proof by mathematical induction is complete!

Proof by Mathematical Induction - Basic-mathematics.com
An Introduction to Mathematics by Alfred North Whitehead. This note covers the following topics: The Abstract Nature Of Mathematics, Variables, Methods Of Application, Dynamics, The Symbolism Of Mathematics, Generalizations Of Number, imaginary Numbers, Coordinate Geometry, Conic Sections, Functions, periodicity In Nature, trigonometry, series, the Differential Calculus, Geometry, quantity.

Get a strong understanding of the very basic of number theory. Life is full of patterns, but often times, we do not realize as much as we should that mathematics too is full of patterns. If I show you the following list: 2, 4, 6, 8, 10,... You may immediately conclude that the next number after 10 is 12.

Basic number theory - Basic Mathematics
Mathematics (from Greek: μ μ , m á th ma, 'knowledge, study, learning') includes the study of such topics as quantity (number theory), structure , space , and change (mathematical analysis). It has no generally accepted definition.
