A risky behavior or process can be replaced by one that results in less risk. A caustic or flammable chemical in a process could present a safety risk. A less hazardous chemical that is capable of accomplishing the desired task should be considered over one that is more hazardous.

Process Safety Fundamentals - Chemical Engineering

Process safety is safety applied to processes, including chemical processes. Table 1-1 provides a more complete definition of process safety, along with several important definitions provided by the American Institute for Chemical Engineers (AIChE) Center for Chemical Process Safety (CCPS).
