Marine Closed "Freshwater" Cooling Systems

The cooling system for the Chevrolet 350 engine consists of a water pump, a radiator and a thermostat. It is of vital importance that the cooling system work properly, as a cooling problem can lead not only to an engine which overheats, but also to more serious problems such as a damaged head gasket or a cracked cylinder block.

How to Troubleshoot an Overheating Chevrolet 350 Engine ...

This is comparable to Mercury Marine's five-year or 1000-hour extended-life coolant for Mercury engines. However, some engine-makers recommend changing out the coolant every two years. Obviously, the best bet is to follow your engine manufacturer's recommendations on maintaining the closed side of your engine's cooling system.

Inboard Engine Cooling Systems - boats.com

Chevrolet engines can be converted for marine use with a few simple modifications. Gasoline engines can provide strong, reliable power for boat propulsion. Parts are easy to get from auto parts dealers and can be much lower in price than marine-specific parts from a marine supply business.
