Learn and understand the educator-verified answer and explanation for Chapter 14, Problem A14-46 in Braun/Tietz ' s Managerial Accounting (5th Edition).

The book starts with a comparison of financial accounting and management accounting - both discussed based on the production firm PENOR Ltd. It further demonstrates accounting work in support of general management (CVP-analysis, DOL, performance measurement, risk management and M&A) as well as cost accounting (structures for absorption and marginal cost accounting systems, internal cost allocations, reporting, monitoring, manufacturing accounting/calculation, contribution margin accounting and activity based costing). The content is explained by detailed case studies. This Asia edition also includes real case studies about companies in Malaysia. All chapters outline the learning objectives, provide an overview, include case studies and how-it-is-done-paragraphs. They end with a summary, the explanation of new technical terms and a question bank with solutions for checking your learning progress. On the internet, you can find more than 300 exam tasks with solutions as well as youtube-videos from the authors.

This book provides a thorough coverage of the essentials of cost accounting from a health care perspective. It covers all of the basic tools of cost accounting common to all industries, and uses health care examples. Part I provides the reader with a solid foundation in the essentials of cost accounting. The chapters in this section provide an introduction to costing and cost definitions. Various approaches to product costing and cost allocation are discussed. Breakeven analysis is also covered, as are techniques for making nonroutine decisions. Part II presents a number of specific tools for improved planning and control. The chapters in this section focus on forecasting and prediction of future costs, budgeting, flexible budgeting, variance analysis, and management control. Part III addresses a number of additional cost accounting tools that can be helpful in generating management information for decision making. Specifically, there are chapters on cost accounting, productivity measurement, inventory, uncertainty, information systems, and performance evaluation. The criticisms of cost accounting and a number of suggested approaches for improvement are discussed in Part IV. The chapters in this part also examine activity-based costing, total quality management, and the future of costing. Each chapter is followed by one or more articles that apply some of the material discussed in the chapter. The last chapter provides a summary of the book.

This well-established and widely adopted textbook, now in its 14th edition, continues to provide an in-depth and insightful analysis of the modern theories and practices of Cost Accounting. That the book has gone into its 14th edition and several reprints is a testimony of its wide acceptance by the students, academics and professionals. Primarily intended for postgraduate and undergraduate students of Commerce and Management, the book will be of immense benefit to the students pursuing professional courses offered by the Institute of Chartered Accountants of India (ICAI), Institute of Cost Accountants of India (ICAI), Institute of Company Secretaries of India (ICSI), and those pursuing the Chartered Financial Analyst (CFA) course. Now, in its 14th edition, the book has been suitably revised meeting the latest syllabi requirement of various courses. The chapter on " Strategic Cost Management " has been updated to make it indispensable to modern management to enhance the competitive advantage of the firm. Besides, many chapters have been overhauled and updated, especially the chapters covering basic concepts and terms, classification of costs and cost sheet, activity based costing, marginal costing, relevant cost analysis and management decisions, capital budgeting decisions, and cost audit. The book also includes some of the cost standards set by ICAI, a wide array of illustrations, worked-out examples, and practice exercises. Besides, a large number of MCQs are given online for the students to practice and self evaluation. MCQs are critical in proper understanding and practice of theories and concepts. Also, CIMA Official Terminology is provided online to keep students and professionals abreast of relevant terms used in today's business environment. For online material, visit https://www.phindia.com/banerjee_cost_accounting_theory. TARGET AUDIENCE • B.Com (Hons.)/BBA • MBA/M.Com • Students pursuing professional courses to become CA, CMA, CFA, CS.
