New Scientist magazine was launched in 1956 "for all those men and women who are interested in scientific discovery, and in its industrial, commercial and social consequences". The brand's mission is no different today - for its consumers, New Scientist reports, explores and interprets the results of human endeavour set in the context of society and culture.

As an annual event, 1st International Conference on Christian and Inter Religious Studies (ICCIRS) 2019 continued the agenda to bring together researcher, academics, experts and professionals in examining selected theme by applying multidisciplinary approaches. In 2019, IAKN Manado successfully held this event for the first time in 11-14 December at Institut Agama Kristen Negeri (IAKN) Manado, Indonesia. There were 134 papers presented during 2 days at the conference from any kind of stakeholders related with Christian education and learning development, Theology, Music and psychotherapy, Psychology and Counselling and Inter-Religious Studies. Each contributed paper was refereed before being accepted for publication. The double-blind peer reviewed was used in the paper selection. From all papers submitted, there were 80 papers were accepted successfully for publication based on their area of interest, relevance, research by applying multidisciplinary.

In the 1950s, East Central Florida underwent a vast transformation with the creation of the American space program. The sleepy fishing communities stretching from Titusville to Melbourne became home to an army of engineers, rocket scientists, and technicians who would soon take Florida and the nation into the missile age. With no opportunities for advanced study nearby, a handful of determined men and women launched Brevard Engineering College in 1958. In 1966, Florida's secretary of state approved the college's petition to change its name to Florida Institute of Technology. In its short history, Florida Tech has overcome formidable hurdles and succeeded in winning a place in the top ranks of scientific and technological universities. A college on the rise, Florida Tech has not only a bright future, but a rich and colorful history that has been captured in striking photographs. The exciting story of "Countdown College"-from the lift-off of Bumper 8 in 1950, which launched the space program in Florida, to the most recent high-tech additions to campus facilities-is the subject of this captivating new pictorial history.
