Get Through MRCPCH Part 2, 125 questions and clinical photographs (208 pages and 125 photos) This book was written and published in 2007 and republished in 2011 and sold more than 20,000 copies. It is my seventh book of my series books on MRCPCH. It was the most popular book I published after the data interpretation book.

Get Through MRCPCH Part 2: Data Interpretation Questions is based on the original title, 100 Data Interpretation Questions in Paediatrics for MRCPCH/MRCP, and provides valuable revision material for candidates sitting the two written papers for Part 2 of the Membership of the Royal College of Paediatrics and Child Health (MRCPCH) exam. This new edition has been revised and expanded and now includes four different question types: best of list; n from many; extended matching questions; and questions to which a written answer must be given. This gives the reader practice in real-life exam style questions as well as more open-ended questions that don't appear in the exam but really test the reader's knowledge while they are revising. It will prepare candidates for questions dealing with data interpretation, including ECGs, EEGs, growth charts, lists of test results and other materials commonly encountered in the examination. The answers are supplemented by invaluable extra information to help the reader understand why an answer is right or wrong, and to aid further revision on the topics covered. All cases have been selected according to the criteria of the MRCPCH exam, comprehensively covering all paediatric topics and coming from years of genuine clinical paediatric experience. This is an essential text for all candidates sitting the MRCPCH exam, as well as examiners and trainers for those exams, senior house officers, specialist registrars and their overseas equivalents.

Get Through MRCPCH Part 2: 125 Questions on Clinical Photographs tests candidates on the interpretation of photographic material. The text contains 125 cases, with accompanying clinical, radiological and ultrasonic imagery. Each case is explored using the multiple choice, extended matching or single option question approach, which is the format used in the MRCPCH Part 2 examination. Detailed discussion of the cases is provided, which is derived from the current editions of widely used standard reference texts. Trainees in paediatrics intending to sit the MRCPCH Part 2 examination will find this book to

2008 Essential  
be an essential revision aid. The authors, Nagi Barakat and Roger Buchdahl, are both Consultant Paediatricians at Hillingdon Hospital, Uxbridge, and, respectively, hold Honorary Consultant posts in Paediatric Neurology at Great Ormond Street Hospital and Paediatric Respiratory Medicine at the Brompton Hospital, London, UK. Reviews of titles written previously by Nagi Barakat: 400 MCQs in Paediatrics for MRCPCCH Part 1 reviewed by Colin M Stern, Consultant Paediatrician "This collection is a valuable addition to the armamentarium of the prospective paediatrician" 100 Grey Cases in Paediatrics for the MRCPCCH reviewed in The Archives of Diseases in Childhood "This text provides the revising trainee with realistic and fair clinical conundrums that have much wider applications than in an examination hall. Like any good revision text this collection of cases allows you to forget that you are actually revising and by the end of the book you develop a knack for identifying pertinent information and ignoring the red herrings. I am sure that this will soon appear on many trainees' bookshelves."

This title is directed primarily towards health care professionals outside of the United States. Written for trainee paediatricians preparing for MRCPCCH exam, it includes over 250 questions and explanatory answers, in the new exam format, covering data and photographic interpretation and using clinical scenarios. The book is well illustrated with charts and table similar to what candidates will see in the exam, and has a popular feature called 'helpful hints' for each series of questions. over 250 varied types of questions includes 'helpful hints' for candidates updated to match the new exam format for MRCPCCH part 2 part of the successful 'Pass Paediatrics' series

Get Through MRCPCCH Part 2: 125 Questions on Clinical Photographs tests candidates on the interpretation of photographic material. The text contains 125 cases, with accompanying clinical, radiological and ultrasonic imagery. Each case is explored using the multiple choice, extended matching or single option question approach, which is the format used in the MRCPCCH Part 2 examination. Detailed discussion of the cases is provided, which is derived from the current editions of widely used standard reference texts. Trainees in paediatrics intending to sit the MRCPCCH Part 2 examination will find this book to be an essential revision aid. 2008 Paperback  
good revision text this collection of cases allows you to forget that you are actually revising and by the end of the book you develop a knack for identifying pertinent information and ignoring the red herrings. I am sure that this will soon appear on many trainees' bookshelves."

Contains 34 integrated questions with multiple photographs, radiological investigations and several stages of decision-making. Contains specialist adolescent cases and additional cases covering commonly-asked questions.

This title is directed primarily towards health care professionals outside of the United States. It is a revision book of questions and answers for Part 2 of the MRCPCH exam - all in the new examination format. Questions have been written in the three styles used in the new examination.

Features 5 practice exams reflecting exam trends, answers with explanations, photographs, ECGs and X-rays to illustrate scenarios and an index.

Get Through MRCPCH Part 1: BOFs and EMQs is an essential revision tool for candidates preparing for the MRCPCH Part 1 examination. This easy to read and comprehensive text has been written in response to changes in the MRCPCH entry criteria and contains 500 questions using the Best of Fives (BOFs) or Extended Matching Questions (EMQs) format. Get Through MRCPCH Part 1: BOFs and EMQs is an invaluable guide for paediatricians in training, those preparing for postgraduate examinations and for paediatricians wishing to update their knowledge. The author, Nagi Barakat, is a Consultant Paediatrician at Hillingdon Hospital, Uxbridge and Honorary Consultant, Paediatric Neurology Department, at Great Ormond Street Hospital for Sick Children, London, UK, and has previously authored several highly successful MRCPCH examination guides.

Radiology plays a fundamental role in the diagnosis and management of childhood diseases. This is reflected in both paediatric and radiology post graduate exams, where candidates are expected to have a working knowledge of paediatric pathology, clinical manifestations and appropriate radiological investigations. Building on the great success of the first edition, Paediatric Radiology for MRCPCH and FRCR retains the popular preexisting structure of the book, but presents an improved variety of clinical cases as well as updated text in-keeping with advances in medical practice and technology. There is more emphasis on cross-sectional imaging, as candidates are increasingly encountering these sophisticated imaging tests in postgraduate exams. Images have been updated, and all the clinical information has been reviewed and revised accordingly. Contains over 100 clinical cases, presented in exam format, with answers overleaf Includes a wide range of common and rare paediatric conditions with supplementary images to

2008 Paperback  
illustrate additional points Uses classic examination images, with salient radiological and clinical summaries of each condition - the "hot lists" Carries specific information for paediatricians and radiologists for each case An introductory chapter on the basic concepts of imaging aims to provide the reader with an approach to radiological imaging and an awareness of the different modalities available, with new sections on non-accidental injury and radiation protection.

This book provides a bank of multiple-choice questions for candidates preparing for Part 2 of the Membership examination of the Royal Colleges of Physicians, the MRCP. The questions are arranged by subject area to enable structured revision and allow candidates to focus on particular areas where they feel less confident. The book has been written with a close focus on recent examinations, with the coverage of topics weighted to reflect the frequency with which they have appeared. The book is structured more as a manual than as a mock exam, and includes explanations for both correct and incorrect answers, focusing comprehensively on the fundamental principles of medical practice. As well as candidates for the MRCP, this book will also be of interest to medical students and students of related health sciences.
