Grammatical Man: Information, Entropy, Language, and Life is a 1982 book written by the Evening Standard's Washington correspondent, Jeremy Campbell. The book touches on topics of probability, Information Theory, cybernetics, genetics and linguistics. The book frames and examines existence, from the Big Bang to DNA to human communication to artificial intelligence, in terms of information processes. The text consists of a foreword, twenty-one chapters, and an afterword. It is divided into four p

Grammatical Man: Information, Entropy, Language and Life ...

Grammatical Man is the first book to tell the story of information theory, how it arose with the development of radar during WW2, and how it evolved. It describes how the laws and discoveries of information theory now support controversial revisions to Darwinian evolution, begin to unravel the mysteries of language, memory and dreams, and stimulate provocative ideas in psychology, philosophy, art, music, computers and even the structure of society.

Grammatical Man: Information, Entropy, Language and Life ...

Just as physics made sense out of the mysteries of earth, air, fire, and water, it can be said that the science of information enriches and unifies an amazing diversity of modern sciences, from physics and mathematics to biology and linguistics. Because symbols, messages, and codes are the stuff not only of computers and telecommunications, but also of living organisms and the forms of human ...
