Employing Indigenous decolonizing research methodologies provides a better understanding to what these motivators, behaviours and goals are in the Indigenous community, aspects which are relatively unexplored when compared with the non-Indigenous population. To our knowledge, there has not been any questionnaire designed by Indigenous researchers to capture information specifically on people's exercise and sedentary behaviours.

Indigenous research methodologies: decolonizing the ...

A research questionnaire is a type of questionnaire intended for research purposes. Research questionnaires are usually printed to a large number of respondents in a certain area. A respondent answers each question depending on the instruction given. If a research survey questionnaire asks open-ended questions, the respondent may give a detailed answer based on his/her knowledge of the topic or issue.

3+ Research Questionnaire Examples & Samples in PDF | DOC

The questionnaire is designed to be used as a verbatim instrument, where the interviewer reads out each question exactly as it appears in print. It will require careful translation into local languages and pre-testing to ensure that respondents easily understand the meaning of each and every question.
