This is a special intake manifold, because unlike the dual-butterfly configuration found on the Prelude H22, this manifolds configuration is like that of the Integra Type-R....single butterfly with shorter intake runners. This intake manifold is specifically designed to fit on the Accord Euro-R, so when purchasing, please be aware that modification is needed to ensure proper installation and operation.

HONDA RBC Intake Manifold. The famous RBC manifold is a genuine Honda part. However straight out of the box it needs modifying and will not fit the K20. This supplied RBC Manifold is modified here in the UK on a CNC vertical machining centre, and are therefore ready to fit straight onto a Civic Type R EP3 or Integra Type R DC5. This is the best inlet manifold available for the K20A engine and it out performs most other manifolds through the whole rev range. With Hondata K-pro this manifold ...

More than a decade ago, Skunk2 's engineers looked to the popular Integra Type R intake manifold for inspiration and went back to the drawing board. Skunk2 's Pro Series Intake Manifold in our signature Black Series finish for Honda's B-series VTEC engines (GS-R only) features a larger plenum and oversized runners when compared to the ITR manifold for maximum horsepower and torque gains.

If you examine a Type R intake manifold you will find that most sources of water heating are removed. Further temperature drops are possible when in addition the interior heating hose is blocked. What the graph shows, is that as you open the throttle, the intake temperature drops slowly as it cools the intake.
