Drawing from the best of the widely dispersed literature in the field and the author's vast professional knowledge and experience, here is today's most exhaustive, one-stop coverage of the fundamentals, design, installation, and operation of industrial refrigeration systems. Detailing the industry changes caused by the conversion from CFCs to non-ozone-depleting refrigerants and by the development of microprocessors and new secondary coolants,

Handbook also examines multistage systems; compressors, evaporators, and condensers; piping, vessels, valves and refrigerant controls; liquid recirculation; refrigeration load calculations; refrigeration and freezing of food; and safety procedures. Offering a rare compilation of thermodynamic data on the most-used industrial refrigerants, the Handbook is a mother lode of vital information and guidance for every practitioner in the field.

The cinema has been the pre-eminent popular art form of the 20th century. In *Cinemas of the World*, James Chapman examines the relationship between film and society in the modern world: film as entertainment medium, film as a reflection of national cultures and preoccupations, film as an instrument of propaganda. He also explores two interrelated issues that have recurred throughout the history of cinema: the economic and cultural hegemony of Hollywood on the

one hand, and, on the other, the attempts of film-makers elsewhere to establish indigenous national cinemas drawing on their own cultures and societies.

Chapman examines the rise to dominance of Hollywood cinema in the silent and early sound periods. He discusses the characteristic themes of American movies from the Depression to the end of the Cold War especially those found in the western and film noir – genres that are often used as vehicles for exploring issues central to us society and politics. He looks at national cinemas in various European countries in the

period between the end of the First World War and the end of the Second, which all exhibit the formal and aesthetic properties of modernism. The emergence of the so-called "new cinemas" of Europe and the wider world since 1960 are also explored. "Chapman is a tough-thinking, original writer . . . an engaging, excellent piece of work."—David Lancaster, *Film and History*
