this book involved research on gender in the first part while the second part focused on research on culture. In the studies on different themes and problems, unique viewpoints were desired to be developed. Different faces of gender inequality were investigated and solutions were suggested. Moreover,

Download File PDF Okuma

various dimensions of cultural phase were examined. The book aimed at contributing to these two fields specifically and current debates in social sciences in general.

A study of the effects of foreign education and contact on the thought

pattern and activities of one of Japan's leading, yet little known, intellectuals and political reforms. Ono Azusa. It is based on his diary, private papers, published works and contemporary accounts.

Today, information and technological developments grow at a rapid pace. Social and

Download File PDF Okuma

political life becomes more and more complicated and, in this process, active citizenship becomes more essential.

Knowledge-driven changes in society and economies require individuals to quickly acquire new skills.

Otherwise, it is increasingly difficult for employees to adapt to

Download File PDF Okuma

business life and to find a job. Education has to take account of these circumstances, adapt to the rapid developments in the world and educate individuals to continue lifelong learning. For this, skills such as active and independent learning, assertiveness, creativity, self-improvement, lifelong learning are important.

Skill teaching differs from knowledge teaching. Skill is the transfer of knowledge to practice. This process involves a learning process that requires the steps of researching, planning, controlling and correcting. The knowledge should be organized, integrated, transferred into practice, mental and physical

resources should be activated, and knowledge use should be demonstrated in practice in order to improve the skill. This book contributes to the teaching of skills and includes basic concepts and skills, language skills, science and mathematics skills, psycho-social skills and visual arts skills. It also

explains how to teach skills, how to prepare for activities and how to implement activities in educational settings.

These applications are intended to draw attention to skill teaching, to raise educators, to increase the success of education, to improve the skills of students, and to enable them to

use the skills they have learned in school outside of school and in complex tasks.
