Kinematic equations relate the variables of motion to one another. Each equation contains four variables. The variables include acceleration (a), time (t), displacement (d), final velocity (vf), and initial velocity (vi). If values of three variables are known, then the others can be calculated using the equations. This page demonstrates the process with 20 sample problems and accompanying ...

[Kinematic Equations: Sample Problems and Solutions](#)

The memory motions we used for problem and solution were very simple. We did a sad face and a thumbs down for problem and a big smile and a thumbs up for solution. This week was a 4 day week (yay!), so we read a read aloud together everyday, did a quick problem and solution match, and then charted the problem and solution. Here are the books we ...

[What's Your Problem? Teaching Problem and Solution](#)

Solution: Although the problem does not say to find the ratio, it is a ratio word problem. What you need to do is to first write the ratio of number of miles the car can travel to the number of gallons of gas the car has. Then, write the ratio in simplest form.
