Service-Learning Essentials is the resource you need to help you develop high-quality service-learning experiences for college students. Written by one of the field's leading experts and sponsored by Campus Compact, the book is the definitive work on this high-impact educational practice. Service-learning has been identified by the Association of American Colleges and Universities as having been widely tested and shown to be beneficial to college students from a wide variety of backgrounds. Organized in an accessible question-and-answer format, the book responds clearly and completely to the most common questions and concerns about service-learning. Each chapter addresses issues related to individual practice as well as to the collective work of starting and developing a service-learning center or program, with examples drawn from a variety of disciplines, situations, and institutional types. The questions range from basic to advanced and the answers cover both the fundamentals and complexities of service-learning. Topics include: Determining what service-learning opportunities institutions should offer How to engage students in critical reflection in academic courses and in cocurricular experiences Best practices for developing and sustaining mutually beneficial campus-community partnerships Integrating service-learning into the curriculum in all disciplines and at all levels, as well as various areas of student life outside the classroom Assessing service-learning programs and outcomes The dilemmas of service-learning in the context of power and privilege The future of service-learning in online and rapidly globalizing environments Service-learning has virtually limitless potential to enable colleges and universities to meet their goals for student learning while making unique contributions to addressing unmet local, national, and global needs. However, in order to realize these benefits, service-learning must be thoughtfully designed and carefully implemented. This easy-to-use volume contains everything faculty, leaders, and staff members need to know about service-learning to enhance communities, improve higher education institutions, and educate the next generation of citizens, scholars, and leaders.

This substantially expanded new edition of this widely-used and acclaimed text maintains the objectives and tenets of the first. It is designed to help students understand and reflect on their community service experiences both as individuals and as citizens of communities in need of their compassionate expertise. It is designed to assist faculty in facilitating student development of compassionate expertise through the context of service in applying disciplinary knowledge to community issues and challenges. In sum, the book is about how to make academic sense of civic service in preparing for roles as future citizen leaders. Each chapter has been developed to be read and reviewed, in sequence, over the term of a service-learning course. Students in a semester course might read just one chapter each week, while those in a quarter-term course might need to read one to two chapters per week. The chapters are intentionally short, averaging 8 to 14 pages, so they do not interfere with other course content reading. This edition presents four new chapters on Mentoring, Leadership, Becoming a Change Agent, and Short-Term Immersive and Global Service-Learning experiences. The authors have also revised the original chapters to more fully address issues of social justice, privilege/power, diversity, intercultural communication, and technology; have added more disciplinary examples; incorporated additional academic content for understanding service-learning issues (e.g., attribution theory); and cover issues related to students with disabilities, and international students. This text is a student-friendly, self-directed guide to service-learning that: [] Develops the skills needed to succeed [] Clearly links service-learning to the learning goals of the course [] Combines self-study and peer-study workbook formats with activities that can be incorporated in class, to give teachers maximum flexibility in structuring their service-learning courses [] Promotes independent and collaborative learning [] Equally suitable for courses of a few weeks' or a few months' duration [] Shows students how to assess progress and communicate end-results [] Written for students participating in service learning as a class, but also suitable for students working individually on a project. Instructor's Manual This Instructor Manual discusses the following six key areas for aligning your course with use of Learning through Serving, whether you teach a senior-level high school class, freshman studies course, or a college capstone class: 1. Course and syllabus design 2. Community-partner collaboration 3. Creating class community 4. Strategic teaching techniques 5. Developing intercultural competence 6. Impact assessment This Manual is free, and available only in PDF format. Download here.

This project-based guide is a blueprint for service learning—from getting started to assessing the experience—and integrates the K-12 Service-Learning Standards for Quality Practice. It provides ideas for incorporating literacy into service learning and suggestions for creating a culture of service. An award-winning treasury of activities, ideas, annotated book recommendations, author interviews, and expert essays—all presented within a curricular context and organized by theme. Digital Content contains all of the planning and tracking forms from the book plus bonus service learning plans, and more.

Service-Learning Essentials is the resource you need to help you develop high-quality service-learning experiences for college students. Written by one of the field's leading experts and sponsored by Campus Compact, the book is the definitive work on this high-impact educational practice. Service-learning has been identified by the Association of American Colleges and Universities as having been widely tested and shown to be beneficial to college students from a wide variety of backgrounds. This easy-to-use volume contains everything faculty, leaders, and staff members need to know about service-learning to enhance communities, improve higher education institutions, and educate the next generation of citizens, scholars, and leaders.

Looks at town-grown relationships with a focus on African Americans.

Randy Stoecker has been "practicing" forms of community-engaged scholarship, including service learning, for thirty years now, and he readily admits, "Practice does not make perfect." In his highly personal critique, Liberating Service Learning and the Rest of Higher Education Civic Engagement, the author worries about the contradictions, unrealized potential, and unrecognized urgency of the causes as well as the risks and rewards of this work. Here, Stoecker questions the prioritization and theoretical/philosophical underpinnings of the core concepts of service learning: 1. learning, 2. service, 3. community, and 4. change. By "liberating" service learning, he suggests reversing the prioritization of the concepts, starting with change, then community, then service, and then learning. In doing so, he clarifies the benefits and purpose of this work, arguing that it will create greater pedagogical and community impact. Liberating Service Learning and the Rest of Higher Education Civic Engagement challenges—and hopefully will change—our thinking about higher education community engagement.

In the updated edition of this important volume, the editors and chapter contributors explore how diverse populations of students experience college differently and encounter group-specific barriers to success. Informed by relevant theories, each chapter focuses on engaging a different student population, including low-income students, Students of Color, international students, students with disabilities, religious minority students, student-athletes, part-time students, adult learners, military-connected students, graduate students, and others. New in this third edition is the inclusion of chapters on Indigenous students, student activists, transracial Asian American adoptee students, justice-involved students, student-parents, first-generation students, and undocumented students. The forward-thinking, practical, anti-deficit-oriented strategies offered throughout the book are based on research and the collected professional wisdom of experienced educators and scholars at a range of postsecondary institutions. Current and future faculty members, higher education administrators, and student affairs educators will undoubtedly find this book complete with fresh ideas to reverse troubling engagement trends among various college student populations.

With contributions from leading experts across disciplinary fields, this book explores best practices from the field's most notable researchers, as well as important historically based and politically focused challenges to a field whose impact has reached an important crossroads. The comprehensive and powerfully critical analysis considers the history of community engagement and service learning, best teaching practices and pedagogies, engagement across disciplines, and current research and policies - and contemplates the future of the field. The book will not only inform faculty, staff, and students on ways to improve their work, but also suggest a bigger social and political focus for programs intended to seriously establish democracy and social justice in their communities and campuses.

As academic service-learning continues to grow rapidly, practitioners are discovering a pressing need for solid empirical research about learning outcomes. Where's the Learning in Service-Learning? helps define learning expectations, presents data about learning, and links program characteristics with learning outcomes. It is the first book to explore the experience of service-learning as a valid learning activity.

Teacher education programs serve traditional and non-traditional students and develop teachers to enter a range of teaching environments. Approaching teacher education through community involvement and learning objectives helps to effectively prepare teachers to serve local and community needs. The Handbook of Research on Service-Learning Initiatives in Teacher Education Programs provides emerging research on the methods and techniques for educators to strengthen their knowledge regarding the intersection of service learning and field placements. While highlighting topics, such as cultural competency, teacher development, and multicultural education, this book explores the benefits, challenges, and opportunities for employing community service as the driving framework for field experiences. This publication is a vital resource for practitioners, educators, faculty, and administrators seeking current research on the opportunity of field involvement to enhance teacher candidates' experiences and provide a channel for meaningful learning.
