Biochemistry: The Chemical Reactions of Living Cells is a well-integrated, up-to-date reference for basic biochemistry, associated chemistry, and underlying biological phenomena. Biochemistry is a comprehensive account of the chemical basis of life, describing the amazingly complex structures of the compounds that make up cells, the forces that hold them together, and the chemical reactions that allow for recognition, signaling, and movement. This book contains information on the human body, its genome, and the action of muscles, eyes, and the brain. * Thousands of literature references provide introduction to current research as well as historical background * Contains twice the number of chapters of the first edition * Each chapter contains boxes of information on topics of general interest

Forensics seems to have the unique ability to maintain student interest and promote content learning.... I still have students approach me from past years and ask about the forensics case and specific characters from the story. I have never had a student come back to me and comment on that unit with the multiple-choice test at the end. from the Introduction to Forensics in Chemistry: The Murder of Kirsten K. How did Kirsten K. s body wind up at the bottom of a lake and what do wedding cake ingredients, soil samples, radioactive decay, bone age, blood stains, bullet matching, and drug lab evidence reveal about whodunit? These mysteries are at the core of this teacher resource book, which meets the unique needs of high school chemistry classes in a highly memorable way. The book makes forensic evidence the foundation of a series of eight hands-on, week-long labs. As you weave the labs throughout the year and students solve the case, the narrative provides vivid lessons in why chemistry concepts are relevant and how they connect. All chapters include case information specific to each performance assessment and highlight the related national standards and chemistry content. Chapters provide: Teacher guides to help you set up Student performance assessments A suspect file to introduce the characters and new information about their relationships to the case Samples of student work that has been previously assessed (and that serves as an answer key for you) Grading rubrics Using Forensics in Chemistry as your guide, you will gain the confidence to use inquiry-based strategies and performance-based assessments with a complex chemistry curriculum. Your students may gain an interest in chemistry that rivals their fascination with Bones and CSI.

Cheeky, original, and decidedly practical to boot, Sin Boldly! is unlike any other writing handbook available. Jammed with sage advice, genuine encouragement, and surprising examples (of how to write and how not to write), this book gives beginning writers and confident students alike an easy-to-follow roadmap for improving one of the most important skills for success. En route to Sin Boldly!-induced, A+ paper bliss, readers encounter such topics as: Choosing a Topic and Telling Your Story ("K.I.S.S.-Keep It Simple, Stupid!)- Literary Games (featuring "Francobabble for Freshman!)- Choosing a Voice ("Dissing the Prof!)- Grammatical Horrors ("A does not equal they")- Common Mistakes ("Hopefully and Other Controversies")Fully revised and updated with new examples, quizzes, and tips, Sin Boldly! is not only a comprehensive guide, but also a fantastic, fun read for anyone who wants to write clearly and effectively .

The Nutshell Studies of Unexplained Death offers readers an extraordinary glimpse into the mind of a master criminal investigator. Frances Glessner Lee, a wealthy grandmother, founded the Department of Legal Medicine at Harvard in 1936 and was later appointed captain in the New Hampshire police. In the 1940s and 1950s she built dollhouse crime scenes based on real cases in order to train detectives to assess visual evidence. Still used in forensic training today, the eighteen Nutshell dioramas, on a scale of 1:12, display an astounding level of detail: pencils write, window shades move, whistles blow, and clues to the crimes are revealed to those who study the scenes carefully. Corinne May Botz's lush color photographs lure viewers into every crevice of Frances Lee's models and breathe life into these deadly miniatures, which present the dark side of domestic life, unveiling tales of prostitution, alcoholism, and adultery. The accompanying line drawings, specially prepared for this volume, highlight the noteworthy forensic evidence in each case. Botz's introductory essay, which draws on archival research and interviews with Lee's family and police colleagues, presents a captivating portrait of Lee.

Meet Ladarat Patalung -- the first and only nurse detective in Thailand. Two nights ago, a young woman brought her husband into the emergency room of the Sriphat Hospital in Thailand, where he passed away. A guard thinks she remembers her coming in before, but with a different husband -- one who also died. Ladarat Patalung, for one, would have been happier without a serial murderer-if there is one -- loose in her hospital. Then again,she never expected to be a detective in the first place. And now, Ladarat has no choice but to investigate. . . . The first novel in a captivating new series by David Casarett, M.D.

Laos, 1978: Dr. Siri Paiboun, a 72-year-old medical doctor, has unwillingly been appointed the national coroner of the new socialist Laos. His lab is underfunded, his boss is incompetent, and his support staff is quirky, to say the least. But Siri ' s sense of humor gets him through his often frustrating days. When the body of the wife of a prominent politician comes through his morgue, Siri has reason to suspect the woman has been murdered. To get to the truth, Siri and his team face government secrets, spying neighbors, victim hauntings, Hmong shamans, botched romances, and other deadly dangers. Somehow, Siri must figure out a way to balance the will of the party and the will of the dead.

In 1909, as a sadistic killer stalks Manhattan's wealthiest heiresses, Sigmund Freud is called in by American analyst Dr. Stratham Younger to assist him in interviewing Nora Acton, a hysterical survivor of the killer who can recall nothing about the attack. A first novel. Reader's Guide included. Reprint. 100,000 first printing.

When you can see things others can't, where do you look for the truth? This paranormal murder mystery will have teens reading on the edge of their seats! Clarity "Clare" Fern sees things. Things no one else can see. Things like stolen kisses and long-buried secrets. All she has to do is touch a certain object, and the visions come to her. It's a gift. And a curse. When a teenage girl is found murdered, Clare's ex-boyfriend wants her to help solve the case but Clare doesn't want to get involved. Then Clare's brother becomes the prime suspect, and Clare can no longer look away. Teaming up with Gabriel, the smouldering son of the new detective, Clare must venture into the depths of fear, revenge, and lust in order to find the killer.
